Hello,

The section "Groundwater Management Assessment" on page SR-59 on the file "Ca water Plan 2013 Vol2_SacramentoRiverRR_PRD_Final_fk_wo.pdf" is a good summary of the response to a survey. It is not really an inventory, I think many GWMPs are missing from the list because they did not have a chance to respond to the survey. For example, in Yolo County, RD2035 has an active program, but they are not on the list. Also RD787 I believe has a GWMP and they are not on the list either.
